- Languages: C++, Java, J2EE, C#, HTML, CSS, JavaScript, React
- Developer Tools: VS Code, Visual Studio, Intellij Idea Ultimate, Eclipse
- Technologies/Frameworks: Spring, Hibernate, .NET
- Databases: MySQL, MongoDb

PROJECT

Farmer Market-Place   Aug 2024
- Platform : Java, Spring Boot, ASP.NET Core, React, MySQL
- Developed an e-commerce platform connecting farmers directly to customers, streamlining the agricultural supply chain
- Implemented secure user authentication system, enhancing overall platform security
- Created product management system for farmers to efficiently list and update produce
- Built RESTful API with Spring Boot and admin module using ASP.NET Core
- Designed responsive React frontend, improving user engagement across devices
- Utilized MySQL for robust data management and storage

News Website   Jan 2024
- Platform : HTML, CSS, JavaScript, NewsAPI
- Developed responsive news website using HTML, CSS, and JavaScript, integrating NewsAPI for real-time content updates
- Implemented dynamic features including news filters, search functionality, and content categorization
- Optimized website performance through efficient coding practices and minimized HTTP requests
- Designed user-friendly interface with intuitive navigation and mobile-responsive layout
- Utilized NewsAPI to deliver curated, up-to-date news across multiple topics

Certification

- Full Stack .NET training at Ducat IT School
- Foundational C# with Microsoft
